

Integral Equations and Operator Theory

Editor: I. Gohberg

**Vol. 10
1987**

**Birkhäuser Verlag
Basel · Boston**

The journal appears bimonthly and is devoted to the publication of current research in integral equations, operator theory and related topics with emphasis on the linear aspects of the theory. The journal reports on the full scope of current developments from abstract theory to numerical methods and applications to analysis, physics, mechanics, engineering and others. The journal consists of two sections: a main section consisting of refereed papers and a second consisting of short announcements of important results, open problems, information, etc.

50 reprints of each paper will be supplied free of charge. Additional reprints cost per 50 copies:
1-2 pages sFr. 109.-, 3-4 pages sFr. 144.-, 5-8 pages sFr. 180.-, 9-12 pages sFr. 223.-, 13-16 pages sFr. 269.-. Reprints exceeding 16 pages are calculated as are the first 16 pages.

Manuscripts are reproduced directly by a photographic process, which excludes the possibility of subsequent alterations.

Authors are therefore requested when preparing manuscripts to observe the instructions printed at the end of the issue most carefully.
